

## **Parking Decks**

Work on the **Parking Decks** includes:

- Replacing existing, high-pressure sodium and metal halide lighting with state-of-the-art, energy-efficient light-emitting diode (LED) fixtures in four parking decks.

An Energy Awareness Program that targets parking deck workers and visitors will also be implemented. This campaign will educate people on ways to reduce energy use through simple behavior modifications.

***These initiatives are projected to save \$69,400 annually in energy costs for these buildings.***
