

How to plan your trip

To successfully use GTA's extensive network of transportation services, you merely need to know:

- Where you are and where you are going.
 - What time you need to be there.
1. First, find the route that serves your present location and your destination.
 2. Next, look for your destination on the schedule and read down the list of arrival times until you find your preferred time.
 3. Finally, trace the times backwards to your current location. This is the time you need to be at the bus stop to board your bus.
 4. If your trip involves the use of more than one route, apply the same method starting with the ending bus route and work backwards.

Please note that the stops represented on the schedule are "timepoints" used to pace the bus progress along the route. There are additional stops in between the timepoints, averaging every other block. You may need to estimate your departure and arrival times in between timepoints.

How to read the maps and schedules

The bus stops here at the times listed below the symbol in the schedule. The numbers on the map represent scheduled timepoints; other stops are served between the timepoints.

The bus travels here sometimes. See schedule for trips that travel this route variation.

The connection point shows where routes intersect and transfers to other routes may be available.

The timetable shows the time that the bus is scheduled to depart or arrive. Light times are A.M.; **bold times are P.M.**

Times are approximate and depend on traffic and weather conditions. Arrive at the bus stop 4-5 minutes early.
